SAFETY FIRST!

Avoid unsafe imitations of our Australian Patent Extension
Ladders

No connection with any other Firm.

KENNETT QUALITY LADDERS

To Our Customers

In the following pages we have endeavoured to illustrate the ladders, etc., we stock for the requirements of Painters, Builders, Plumbers, Electricians, Tilers and Slaters, Orchardists, Householders, etc.

Kennett Ladders are recognized throughout Australia for their compactness, durability and efficiency, and the prices are kept as low as possible, consistent with good quality. Because of their outstanding quality, **more Kennett Ladders are sold in Australia than any other make.**

Every Kennett Product is constructed of specially selected air dried timber and manufactured under the experienced supervision of Mr L. T. Kennett.

Prompt and careful attention is given to either large or small orders, and on request our representative will be pleased to call and quote for special ladders, steps and garden seats.

New clients will save delay by remitting with order cheque, money order or postal note to the value of the goods required, or at least two trade references.

Delivery free to city, boat, rail or suburbs. Freight should be added where station is a prepaid one.

We wish to convey our appreciation to our customers for their past valuable support and hope to be favoured with a continuance of their orders, which will always have our best care and attention.

Yours faithfully,

L. T. KENNETT.

QUALITY LADDERS

EXTENSION LADDERS

TO LAST

IMPROVED PATENT

No. 14525

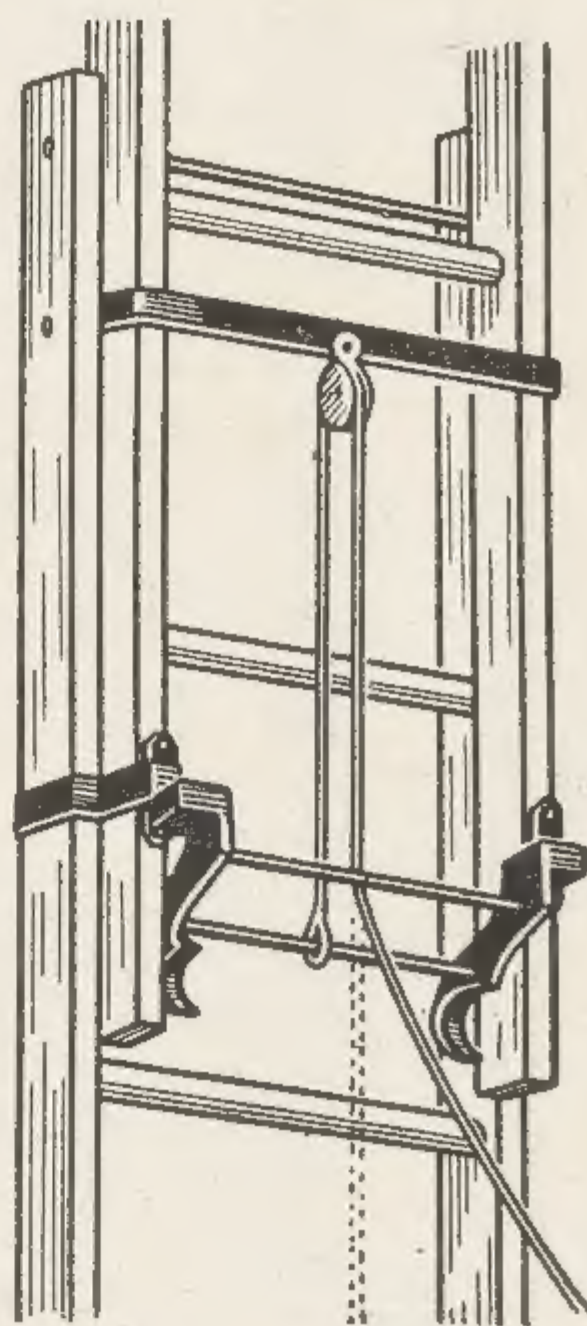

KENNETT Patent Safety Extension ladders are used extensively by P.M.G. Departments, Councils, Railway Departments, Householders, and all tradesmen throughout Australia. They are very simple to manipulate and are light, taking into consideration the height to be reached. The sections may be detached and used separately, by untying rope and sliding one section from the other.

STYLES.—Made from selected **AIR-DRIED** Oregon, reinforced with No. 8 Gauge Galvanised Wire.

RUNGS.—Made from selected Spotted Gum.

ROPE.—Best N.Z. Flax. May be attached to the side or centre. When ordering, please state which way is required.

CLUTCH LOWERING

THE CLUTCH AND SIDE CLIP.—Made from very strong malleable iron.

The clutch automatically grips the nearest rung, immediately the rope is released—requires no adjusting whatsoever.

A, B and C show our latest patent safety improvements in extension ladders. (A) note non-rock side clips.

KENNETT LADDERS

WINDOW CLEANERS' EXTENSION AND ORDINARY LADDERS

Light, but strongly constructed to suit all requirements of window cleaners.

KENNETT LADDERS

KENNETT TELESCOPIC

(Appl. No.

Vertical Type

As supplied to the Municipal Council of Sydney, St. George's County Council, F. H. Fearon (Consulting Engineer, Newcastle), Rylands Ltd., Embassy Theatre, for use on overhead lights, etc.

Also extremely useful for interior and exterior repairs of churches, public buildings, etc. The ladder is wheeled into position, extended to the required height, and quickly lowered or raised again as circumstances require.

Made in two or more sections and fitted with a detachable base for transport purposes.

Strongly constructed of selected timbers and malleable castings.

With or without rubber-tired wheels.

Prices on Application.

QUALITY LADDERS

TOWER LADDERS

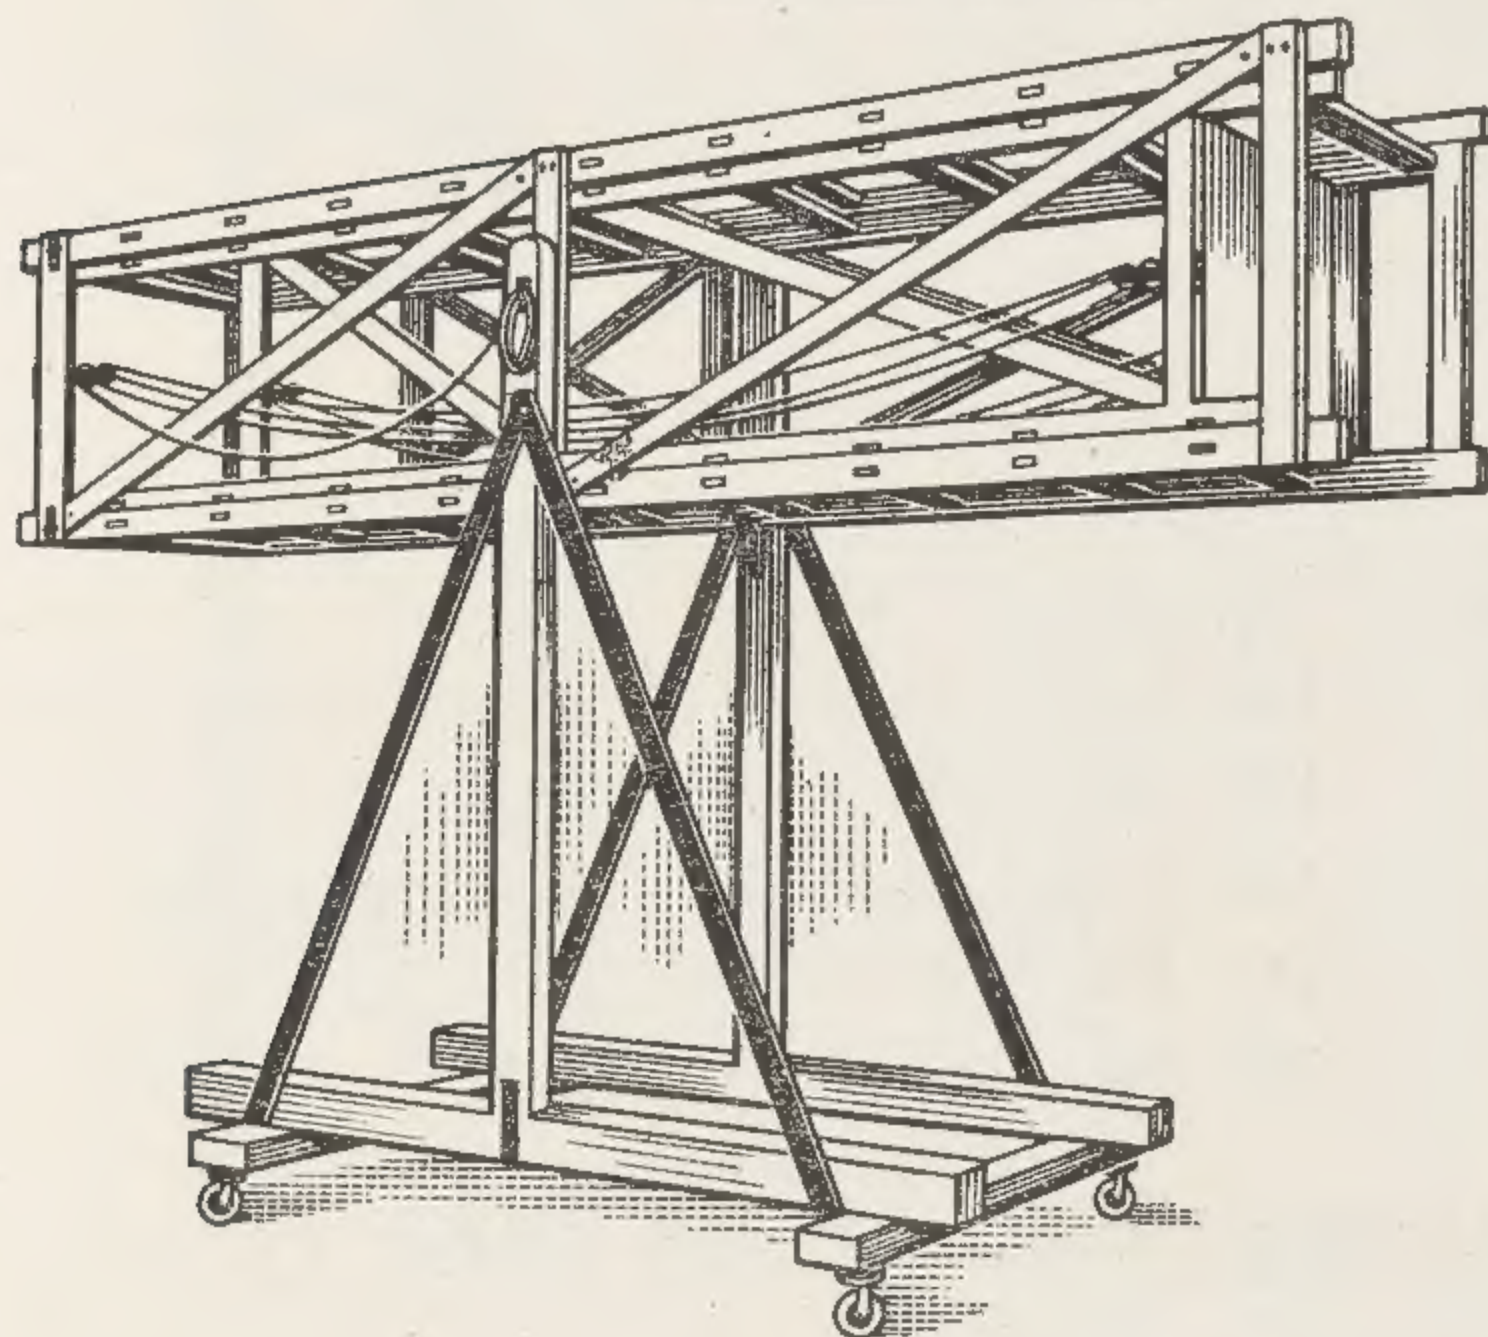

29433/29808)

Safety Clutch

The Springless Automatic Clutch illustrated on the right is made from specially annealed malleable iron. Fitted to KENNETT Tower Ladders.

HORIZONTAL TYPE

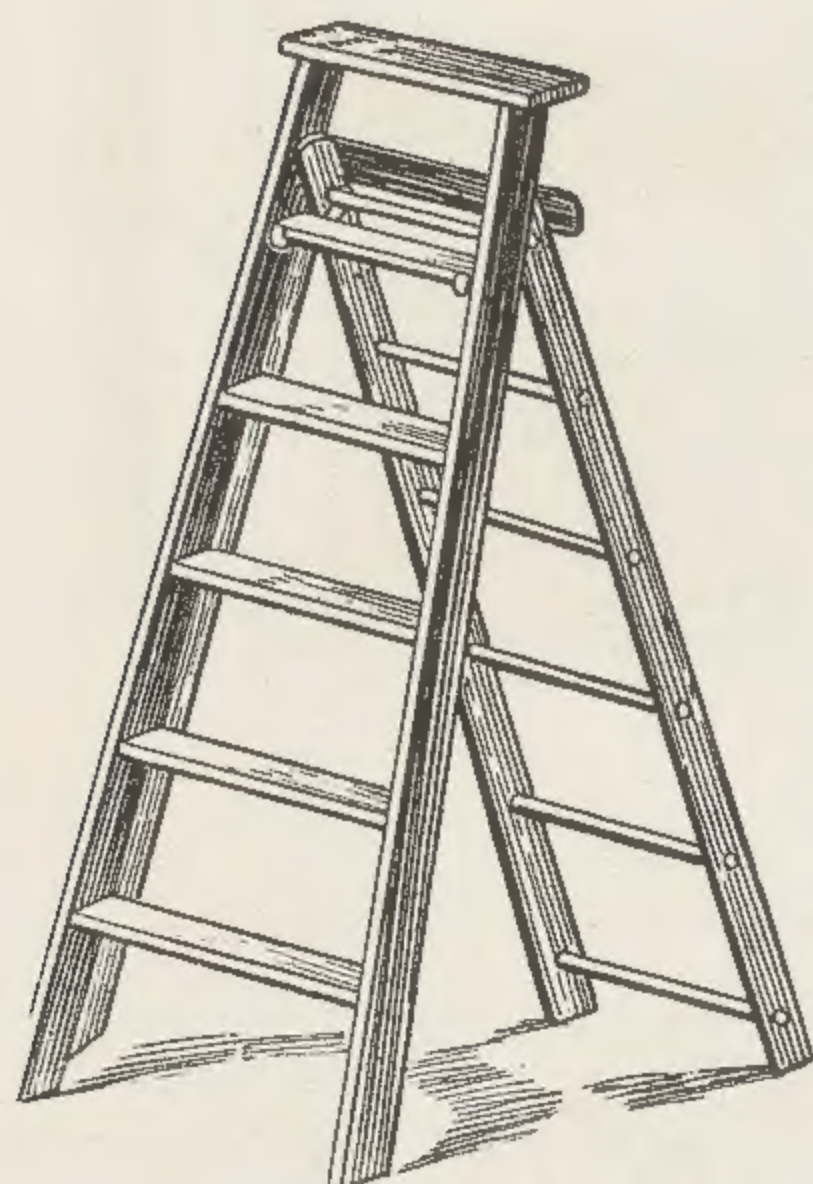

This type of ladder tower is especially designed to minimise the labour of removing the Tower from the base to pass through doorways, arches, etc. One man can quite easily convert the ladder from a vertical to a horizontal position, by simply releasing a pin at base.

Made in two or more sections—Prices on Application.

QUALITY LADDERS

STEP LADDERS

28616)

A very strong and serviceable combined step and ladder, suitable for painters', electricians' and all household requirements.

The front section is well fitted, screwed and reinforced.

The step-ladder is readily converted into a ladder, by simply placing the back section (with the Batten against the wall) upon the hooks fitted to the front section.

When used as a step the back section must be extended as far out as possible to ensure rigidity.

STILES: Selected Oregon.

TREADS: Selected Pine.
